The aim of the bachelor thesis is for students to prove that they are able to reflect on an academic issue independently. No more and no less. As such, it is not a case of ploughing through as broad a topic as possible, or of inventing something entirely new. Quite the contrary in fact: in the bachelor thesis, the topic should be clearly defined.

The atoms at the step edges form tetra- hedrons with the adjacent atoms in the lower lying terrace[8,10]. One side of such a tetrahedron is indicated by the green triangle in the right side. The step height is a little bit smaller than one atom, namely the height of the tetrahedron made up by four gold atoms.

As I understand it, you are the bachelor (or at least the bachelor candidate) by virtue of being on the course, and the thesis is yours, so bachelor's thesis is the correct way to go. On the thesis/dissertation thing, a thesis is your argument or proposition, and a dissertation is the discourse you defend it with.
