The trilogy contains Doctor Copernicus, Kepler, and the Newton Letter. Let me start by saying that Banville made a career transition that is reflected in these novels. Copernicus and Kepler are excellent historic fiction, trying to get into the consciousnesses of these two great men and thinkers.

Banville has written three trilogies: the first, The Revolutions Trilogy, focused on great men of science and consisted of Doctor Copernicus (1976), Kepler (1981), and The Newton Letter (1982). He said he became interested in Kepler and other men of science after reading Arthur Koestler 's The Sleepwalkers . [18]

## **John Banville - Wikipedia**

This is the third Banville novel I have read and I find his writing exceptional and challenging. I first read The Sea and then Kepler. Doctor Copernicus, while less poetic than The Sea, is my favorite of the three. I think it is significant that Banville in his Acknowledgments mentions Thomas S. Kuhn's The Copernican Revolution as a major source.
