Radius : Securing Public Access to Private Resources ...

Since VPNs don't provide 100% security coverage for Wi-Fi networks, the industry has standardized on 802.1X, a link layer security protocol for wireless networks using the RADIUS Server. Link layer security protects a wireless network by denying access to the network itself before a user is successfully authenticated.

RADIUS Server Security for WiFi Networks

Private wireless networks should be encrypted with WPA2-Personal security, at least, to keep others from connecting and eavesdropping on your network traffic. Businesses with
